## JAKE 800/804 HD for mounting a loader crane on a tractor

A loading crane on a tractor is an efficient solution for power line maintenance and many other all-terrain tasks.

JAKE Front Legs, PTO Pump Unit, Oil Tank, ToolBox System and Boom Support complete the unit.

JAKE can supply the whole unit, including the tractor and crane, or use an existing tractor and/or crane.

The tractor can be equipped with a front loader, cabin suspension and front axle suspension.

**JAKE 804 HD** for Valtra N4 and T4 series,  
**JAKE 800 HD** for other tractor models.
